About JML

As the largest carbon fibre manufacturer in China, JML has rich experience in making musical instrument cases. JML also OEMs for many well-known brands such as GEWA from Germany.

Starting from violin cases, we slowly developed various products to meet the needs of more musicians. Our newly developed products this year include guitar cases, guzheng cases, erhu cases, wind instrument cases, etc.

We have a unique design concept to improve the shortcomings of existing music instruments cases in the market. Coupled with our own R&D team and production team, we can independently design and produce our own musical instrument cases with durable material and stable quality.
